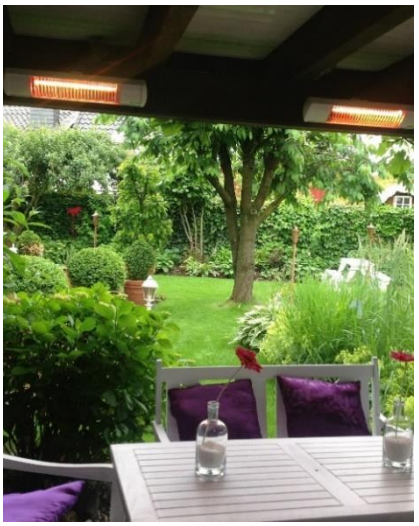
The world's most efficient radiant heaters
low glare - high band infra red



TANSUN®

WORLD LEADERS IN RADIANT HEATING

The world's most efficient radiant heaters low glare - high band infra red

Tansun, pioneered infrared electric outdoor heating technology 30 years ago, and maintains an unrivalled reputation as world leaders in the development of indoor and outdoor quartz electric heaters. The recently developed Tansun Ambient Series heaters are the most efficient outdoor heaters on the market.

Benefits of Tansun Heaters

- Unparalleled power and performance.
- Direct instant heat at the flick of a switch with no warm up time.
- Economical and efficient.
- Significantly lower running costs than other forms of heating.
- No heat loss through draft as Tansun I.R. warms people not air.
- Superior reliability - 6000hr lamps.
- Lower installation costs due to lower power use and no plumbing.
- Soft ambient light will add to the conviviality of any occasion.
- No extra ventilation required.
- No dangerous emissions.
- Noiseless & odourless.

Most good bars and restaurants now choose radiant electric heating for their alfresco areas as they are more reliable and efficient than their gas counterparts. Many patrons are now demanding these for their decks and BBQ areas at home, but beware, not all electric heaters are born equal.

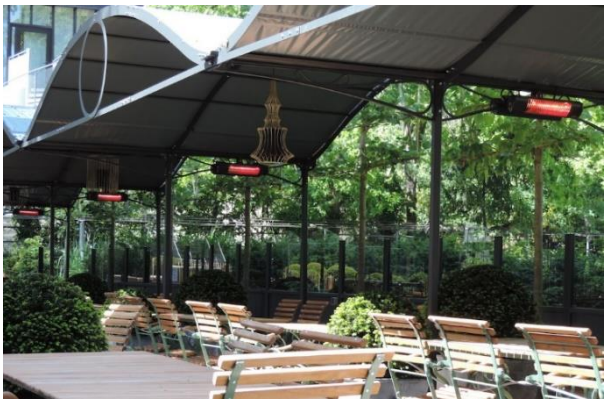
Tansun Ambient Series

Earlier series Tansun heaters emit a pleasant ambient glow when turned on which is perfectly fine and even desirable in some settings. However in many settings less light or glare is wanted from the heaters but with no diminishment in heat output.

To provide a suitable solution for this problem, Tansun have designed the new ‘ultra low glare’ Ambient Series.

As soon as this range of heaters is switched on the user will feel the heat output and performance which Tansun are synonymous for, however, the user will also see that there is a significant reduction in glare which the heater emits.



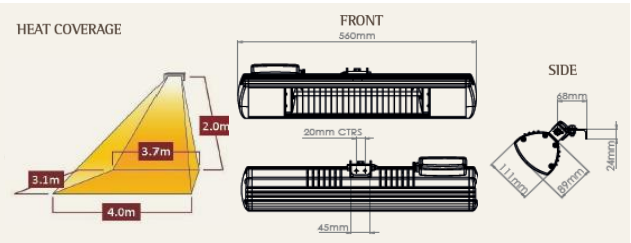
Tansun Bahama

This stylish top of the range ultra low-glare heater is designed to fit discreetly into many environments.
The Bahama is available in single 1.5 and double 3.0kW . Its sleek design allows it to blend in effortlessly into many environments. This heater’s design also allows it to be used under awnings and umbrellas. With its high IP 55 rating the Bahama is the prefect ambient heating solution for outdoor environments.

Bahama Single 1.5kw

$899 including GST

It comes as standard with a central swivel bracket, allowing versatile direction of the heat.
Ideal for lower mounting heights 2- 2.5m due to its wide coverage area. Heats up to 12sq metres.
Available in Black & Silver



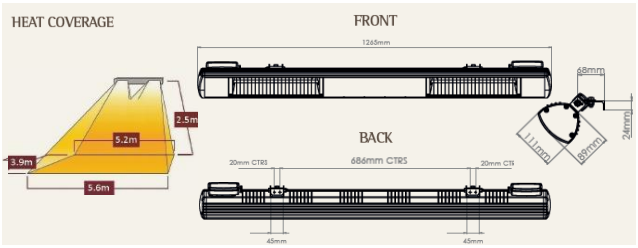
TECHNICAL DATA	
Model Type	BAH 215IP55
Voltage (Volts)	230
Power (Watts)	1500
Current (Amps)	6.5
Min. mounting height from floor (m)	2.0
Min. distance from ceiling (m)	0.3
Min. distance from side wall (m)	1.0
Dimensions WxHxD (mm)	560 x 110 x 89

Weight (kg)	2.8
Ingress Protection	IP55
Mounting	Horizontal on wall or angled on a suitable structure
Connection	3.0m of cord with a moulded 3 Pin Plug
Package Contents	Heater with L-Shaped wall mounting bracket and an instruction manual

Bahama Double 3kw

$1899 including GST

This sleek heater gives increased coverage over the Bahama Single while still retaining the ability to fit into many different environments. Heats up to 21sq metres.
Supplied with 2 power cables for individual switching.
Available in Black & Silver



TECHNICAL DATA	
Model Type:	BAH 215IP55D
Voltage (Volts)	230
Power (Watts)	2x1500 (Tot 3000)
Current (Amps)	13
Min. mounting height from floor (m)	2.5
Min. distance from ceiling (m)	0.5
Min. distance from side wall (m) 1.0	1.0
Dimensions WxHxD (mm)	1265 x 110 x 89

Weight (kg)	6.0
Ingress Protection	IP55
Mounting	Horizontal on wall
Connection	2 x3.0m of cord with a moulded 3 Pin Plug
Package Contents	Heater with L-Shaped wall mounting bracket and instruction manual

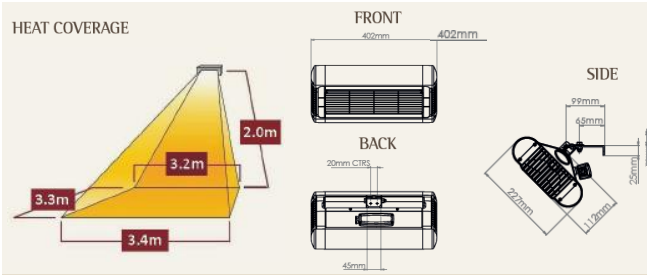
Tansun Monaco

The Monaco is a powerful ultra low glare heater. Its design allows it to heat large areas, both indoors and out. Tansun Monaco is available in single 1.5 double 3.0 kw and triple 4.5 kW versions.. This range of larger heaters give exceptional performance and make Monaco the outstanding choice for any environment where a good level of heat is required but with much less glare normally associated with powerful infrared heaters.
This heater has an IP 55 rating, making it highly suitable for many outdoor environments.
Monaco heaters have a more focussed beam than Bahamas meaning they throw the heat further, but they need to be mounted higher or further away to get good coverage. Monacos can also be hung or mounted directly overhead if required.

Monaco Single 1.5kw

$899 including GST

This premium ultra low-glare heater is supplied as standard with central swivel bracket allowing versatile movement.
Heats up to 11 sq metres.
Applications include, bars , restaurants, decks, barbeque areas, warehouses, loading docks, halls, gyms, shops and areas that are difficult to heat due to a lack of insulation.
Available in Black

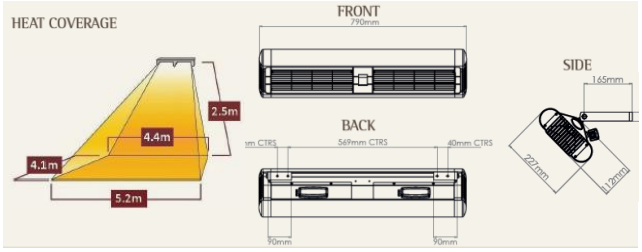


TECHNICAL DATA	
Model Type	MON 215IP55
Voltage (Volts)	230
Power (Watts)	1500
Current (Amps)	6.5
Min. mounting height from floor (m)	2.0
Min. distance from ceiling (m)	0.5
Min. distance from side wall (m)	1.0
Dimensions WxHxD (mm)	402 x 227 x 323

Weight (kg)	3.4
Ingress Protection	IP55
Mounting	Wall or ceiling hung
Connection	3.0m of cord with a moulded 3 pin plug
Package Contents	Heater with L-Shaped wall mounting bracket and an instruction manual

Tansun Monaco Double 3kw **$1550** including GST

This heater gives increased power and coverage compared to the Monaco Single, however it must be mounted at around 3 metres or more because of its high heat output.
It is supplied with 2 mounting brackets allowing vertical adjustment only.
Supplied with 2 power cables for individual switching.
Heats up to 20 sq metres. Applications as per Monaco Single but this heater is suitable for larger areas due to its larger throw distance. Available in Black.



TECHNICAL DATA	
Model Type	MON 215IP55D
Voltage (Volts)	230
Power (Watts)	2x1500 (Tot 3000)
Current (Amps)	13
Recommended min. mounting height from floor (m)	3.0
Min. distance from ceiling (m)	0.5
Min. distance from side wall (m)	1.0
